PROFESSIONAL SUMMARY

Senior Game Engineer specializing in developer tooling and pipelines — building the engines, editors, and automation other developers rely on. ~9 years across PC, VR, and mobile (Meta Quest, Switch), with a track record of multiplying team productivity: CI/CD pipelines adopted by 5 projects, reusable engine tooling, and editor tools that measurably cut build and debug time. Strong in C# and Unity3D (C++ knowledgeable), with a passion for mentoring and elevating team workflow.

WORK EXPERIENCE

- Skeleton Crew Studio, Senior Game Engineer** 02/2021 – Present
Kyoto, Japan
- Architected scalable gameplay systems and custom tools across multiple shipped titles, and resolved critical performance/stability bottlenecks on constrained platforms (Quest, Switch).
 - Designed and deployed CI/CD build pipelines adopted by 5 projects, cutting build-and-test time by ~70% — plus in-editor build-trigger tools that launch builds straight from Unity.
 - Built reusable engine and editor tooling — a Unity visual-novel engine (2 projects) and a node-based Yarn Spinner editor that cut debugging/testing time by ~50% (see Projects).
 - Founded an internal learning center consolidating research and findings, enabling knowledge-sharing across all teams.
 - Mentored junior developers, fostering a collaborative, team-focused culture.

EARLIER EXPERIENCE (2016–2021)

Earlier game/tools roles across Egyptian studios — a consistent through-line of building 3D apps, games and developer tools.

- FunRock, Game Engineer** 09/2020 – 02/2021
Alexandria, Egypt
- Augmentoria, Game Engineer** 06/2019 – 04/2020
Cairo, Egypt
- Raskulls Game Studio, Gameplay Programmer** 07/2018 – 04/2019
Cairo, Egypt
- 3DScales, Software Engineer** · built the Cross Section Engine, a browser 3D slicing tool (live demo) 10/2016 – 04/2017
Tanta, Egypt

SKILLS

- Languages:** C# (Proficient), C++ (Knowledgeable), JavaScript (Familiar) **Engines:** Unity3D (Proficient), Unreal Engine (Familiar)
- Technologies:** Photon, Virtual Reality, Yarn Spinner, CI/CD **Platforms:** PC, Meta VR/Quest, Switch
- Core Concepts:** Game Engine Architecture, Computer Graphics, 3D Math **Practices:** Editor & Pipeline Tooling, Build Automation, Performance Optimization, Mentoring

PROJECTS

- UI Studio, Senior Game Engineer** Internal — Skeleton Crew Studio
Standalone Unity package — editor tool + runtime navigation for authoring uGUI screens and routing between them. Adopted by 3 projects; stands up a working game flow in a day.
- Visual Novel Engine & Node Editor, Senior Game Engineer** Internal — Skeleton Crew Studio
Reusable Unity visual-novel engine (2 projects) + a node-based editor to author, visualize, and debug Yarn Spinner flow — cut debugging/testing time ~50%.
- Fantasketch ↗, Senior Game Engineer**
A puzzle-action game where the characters you draw come to life and move — control your creation and guide it to the goal. Available on Steam.
- TwinSoul ↗, Senior Game Engineer**
Upcoming music-action game set in mythological Japan. Demo available on Steam.
- Death Game Hotel ↗, Senior Game Engineer**
An intense VR strategy battle, available on Meta Quest and Steam.
- Autoliv ↗, Game Engineer**
An interactive product-visualization experience for Autoliv, the world's largest automotive safety supplier.

EDUCATION

- Information Technology Institute (ITI)** 10/2017 – 07/2018
9-Month Professional Diploma — Game Development Track
Cairo, Egypt
- Tanta University — Faculty of Engineering** 10/2009 – 07/2016
B.Sc. in Computer Science and Automated Control
Tanta, Egypt
